## EDUCATION

|                                                                              |                    |
|------------------------------------------------------------------------------|--------------------|
| Nxtwave Disruptive Technologies                                              | Aug 2022 - Ongoing |
| Industry Ready Certification in Full-stack Development                       |                    |
| Methodist College of Engineering and Technology, Hyderabad                   | 2022 - 2026        |
| BE (Bachelor of Engineering) - Computer Science Engineering (CSE) (6.9 CGPA) |                    |
| Keshav Smark Junior College, Hyderabad                                       | 2020 - 2022        |
| Intermediate - MPC (88.0%)                                                   |                    |
| Spring Field School, Hyderabad                                               | 2016 - 2020        |
| Secondary School of Certificate (9.2 CGPA)                                   |                    |

## SKILLS

- **Programming Languages:** Python, JavaScript, C++, SQL
- **AI / Machine Learning:** TensorFlow, Scikit-learn, NumPy, Pandas, OpenCV
- **Web Development:** React, Next.js, Node.js, Express.js, Tailwind CSS
- **Data Visualization:** Matplotlib, Seaborn
- **Concepts:** Reinforcement Learning, Multi-Agent Systems, REST APIs
- **Tools:** Git, GitHub, Postman, VS Code, Google Cloud, OpenAI API, n8n
- **Databases:** MySQL, PostgreSQL, MongoDB

## EXPERIENCE

### Artificial Intelligence Intern

Codec Technologies Pvt. Ltd. | May 2025 – June 2025

- Developed a **Spam Email Classifier** using **NLP and machine learning techniques**
- Applied **text preprocessing and TF-IDF vectorization** for feature extraction
- Implemented classification models for spam detection
- Built a **Stock Price Prediction system** using time-series data analysis
- Performed **data preprocessing and feature engineering** on historical stock data
- Implemented ML models to predict future price trends
- Designed **end-to-end ML pipelines** including preprocessing, training, and evaluation
- Technologies: Python, Pandas, NumPy, Scikit-learn

## PROJECTS

### HiveMind AI: Scalable Multi-Agent RL Framework

- Built a **multi-agent reinforcement learning system** using **PPO + CTDE architecture**
- Solved **non-stationarity in MARL** using centralized critic and shared policy networks
- Achieved **90% success rate**, outperforming SAC (~16%) in identical conditions
- Developed **end-to-end pipeline**: simulation → training → evaluation → visualization dashboard
- Developed **FastAPI + React-based dashboard** for real-time metrics monitoring

**Technologies:** Python, PyTorch, Stable-Baselines3, FastAPI, React, TensorBoard

### AI Wiki Quiz Generator

[Live](#)

- Developed an AI-powered platform to convert Wikipedia content into quizzes
- Developed backend for **content extraction and AI-based question generation**
- Implemented **real-time scoring, progress tracking, and quiz history**
- Created a responsive UI with dedicated **Generate Quiz** and **History** modules

**Technologies:** Python, FastAPI, LangChain, Gemini API, React, PostgreSQL

### Clip Genie

[Live](#)

- Built a video clip management platform with **secure authentication and upload system**
- Implemented **real-time upload tracking and media organization features**
- Designed responsive UI for efficient video interaction and management

**Technologies:** Next.js, Tailwind CSS, NextAuth, MongoDB, TypeScript

### Portfolio

[Live](#)

- Built personal portfolio showcasing projects and technical work
- Implemented responsive UI and integrated GitHub + social links

**Technologies:** Next.js, React, TypeScript, Tailwind CSS

## PUBLICATIONS

- *HiveMind AI: Emergent Intelligence through Multi-Agent Systems using PPO-based CTDE Architecture*  
Published in **International Journal for Research in Applied Science & Engineering Technology (IJRASET)**, Vol. 14, Issue IV, April 2026
  - Explored **multi-agent reinforcement learning** using **PPO and CTDE architecture**
  - Demonstrated emergent intelligence in decentralized agent systems
- *Uncovering App Market Dynamics: Tableau Visualization of Google Play Store Data*  
Published in **International Research Journal of Innovations in Engineering and Technology (IRJET)**, Vol. 9, Issue 6, pp. 6–13, June 2025
  - Applied **Tableau-based data visualization** to analyze large-scale Google Play Store datasets
  - Derived insights on **market trends, user behavior, and app performance patterns**

## CERTIFICATES

- Python Essentials 1 (PCEP) – OpenEDG Python Institute
- JavaScript Essentials – NxtWave
- Responsive Web Design – NxtWave
- Dynamic Web Application Development – NxtWave

## WORKSHOPS

Data Visualization & Business Intelligence using Power BI – ElectroCloud Labs

## ACHIEVEMENTS

- Secured **2nd place** at *HackForge 2.0 Hackathon* (ISL Engineering College)
  - Developed a **scalable AI decision intelligence system** for processing heterogeneous data and generating predictive insights
  - Designed pipeline for **real-time analytics and model optimization** under a 12-hour competitive build
  - Incorporated **Explainable AI (XAI)** concepts to improve model interpretability and trust
- Selected as **Web Tech Lead**, GDGC MCET – led web initiatives and technical activities
- Completed **7-Day Milestone**, *NxtCode – 7 Under 7 Challenge* (Sept 2024)
